**CDW-G ACQUIRES SELECTED ASSETS OF T³ CORPORATION'S
SCIENTIFIC INFORMATION TECHNOLOGY PRODUCTS DIVISION**

Allows CDW-G To Sell Through SEWP III

VERNON HILLS, IL, February 5, 2004 – CDW Government, Inc. (CDW-G), the government and education subsidiary of CDW Corporation (Nasdaq: CDWC), today announced it has acquired selected assets of T³ Corporation's Scientific Information Technology Products Division, including contract No. NAS5-02148 awarded in connection with NASA's Scientific and Engineering Workstation Procurement III (SEWP) program. Terms of the acquisition were not disclosed.

“Acquiring these assets, including access to the SEWP program, is a strategic move for CDW-G,” said Jim Shanks, president of CDW-G. “It significantly enhances CDW-G's contract portfolio and flexibility when serving federal customers such as the Department of Defense and its authorized contractors.”

SEWP is a Government-Wide Acquisition Contract (GWAC) consisting of 22 contracts, including 10 small business contracts, which enable purchasers to buy a wide selection of technology -- from Unix, Linux, and Windows-based workstations and servers, to peripherals, network equipment, storage devices, and other technology products.

-more-

“As a SEWP contractor, CDW-G can now provide federal agencies with another avenue to purchase best-of-breed technology at the best prices and to obtain advice based on our deep knowledge of technology products and services from multiple vendors,” said Shanks. “Plus, with SEWP’s faster ordering capabilities and CDW-G’s same-day shipping in most instances, it’s a great fit for our distribution model.”

Managing the contract for CDW-G will be Kathy Marcheselli, who has more than 10 years of experience working with the NASA SEWP program.

Customers can access the SEWP contract online at www.sewp.nasa.gov.

T³ Corporation is headquartered in Fairmont, West Virginia, and provides on-site technology services to the government and corporations. It also is a reseller of specialized computer software, hardware and products.
